<p>Explanation of Overcard</p>

<p>The term overcard describes a card being higher in rank with</p>

<p>relation to another card (or group of cards). Here are two

common examples.</p>

<p>Example 1 </p>

<p>In Hold em we have a big pair preflop (JJ) and the flop tex

ture comes down as KQx. We</p>

<p>could describe this by saying that there are two overcards on the fl

op.</p>

<p>Example 2 </p>

<p>We have AQo and the flop comes down 952 rainbow. We could describe thi

s by saying we</p>

<p>flopped naked </p>

<p>Example of Overcard used in a sentence -</p>

gt;

<p>with our pocket Queens and really hoped </p>

dn t bring any</p>

<p>overcards.</p>

<p>How to Use Overcard as Part of Your Poker Strategy</p>

<p>When flopping a pair in</p>

<p>Hold em, it s vulnerability often depends on how many overc

ards might fall on the later</p>

<p>streets. Lower pairs are more susceptible </p>

since there are simply more</p>

<p>overcards that can hit. A high pair such as Queens however is </p>

<p>less vulnerable to being</p>

<p>outdrawn since there are only two overcards that can potentially give

our opponent a</p>

<p>higher pair, </p>
